New Delhi: Renewable energy solutions provider Suzlon Group has bagged an order for a 47.6 MW [wind](#) power project from KP Group in Gujarat. However, the company did not disclose the value of the order. The project is located at Vagra in Bharuch district in Gujarat and is expected to be commissioned in 2024, a company statement said.

A project of this size can provide electricity to 36,000 households and curb 1.42 lakh tonne of CO2 emissions per year. Suzlon will supply their S133 wind turbines (equipment supply) and supervise the execution and commissioning of the project. It will also provide comprehensive operations and maintenance services post-commissioning, said the statement.

JP Chalasani, Chief Executive Officer (CEO), Suzlon Group said, "The power generated from this project will serve the Commercial & Industrial (C&I) consumer segment, which is a key segment to drive deeper penetration of renewables in India."
