KPI Green Energy appoints Surinder Kumar Negi as COO

KPI GREEN ENERGY LIMITED

KPI Green Energy Ltd., a leading player in India's renewable energy sector, announced the appointment of Surinder Kumar Negi as its Chief Operating Officer (COO).

Negi brings over four decades of extensive experience in the power transmission, renewable energy, and infrastructure development sectors, having held leadership roles at NTPC, POWERGRID, ALSTOM, Reliance Energy, Gujarat Energy Transmission Corporation (GETCO), and Skipperseil Ltd.

With a proven track record in power transmission, renewable integration, and project execution, Negi has been instrumental in shaping India's energy

infrastructure. As Managing Director of Gujarat Energy Transmission Corporation (GETCO), he added 830 new substations and 21,300 km of transmission lines, expanding Gujarat's power grid to support over 23,000 MW of generation capacity. Under his leadership, GETCO invested over Rs. 12,000 crore in infrastructure development, achieving industry-leading transmission losses below 4% and improving system availability to 99.6%. His initiatives played a critical role in ensuring 24x7 uninterrupted power supply across Gujarat.

Mr. Surinder Kumar Negi appointed as Chief Operating Officer of KPI Green Energy Limited

KPI Green Energy Ltd., a leading player in India's renewable energy sector, is pleased to announce the appointment of Mr. Surinder Kumar Negi as its Chief Operating Officer (COO). Mr. Negi brings over four decades of extensive experience in the power transmission, renewable energy, and infrastructure development sectors, having held leadership roles at NTPC, POWERGRID, ALSTOM, Reliance Energy, Gujarat Energy Transmission Corporation (GETCO), and Skipperseil Ltd.

With a proven track record in power transmission, renewable integration, and project execution, Mr. Negi has been instrumental in shaping India's energy infrastructure. As Managing Director of Gujarat Energy Transmission Corporation (GETCO), he added 830 new substations and 21,300 km of transmission lines, expanding Gujarat's power grid to support over 23,000 MW of generation capacity. Under his leadership, GETCO invested over ₹12,000 crore in infrastructure development, achieving industry-leading transmission losses below 4% and improving system availability to 99.6%. His initiatives played a critical role in ensuring 24x7 uninterrupted power supply across Gujarat.

Mr. Negi's leadership has been recognized at the national and global levels:

- Best Engineer Award (2014-15) by CBIP for his contributions to India's power transmission sector.
- Distinguished Fellow Member Certificate by CIGRE (2016) for excellence in grid modernization and high-voltage transmission solutions.
- Spearheaded India's first large-scale Smart Grid Technology integration, deploying Optical CT, Digital Substations, PMUs, and AI-driven grid analytics.
- Led GETCO in implementing one of India's most advanced Load Despatch Centres, ensuring real-time RE forecasting, grid balancing, and smart transmission control.

At KPI Green Energy, Mr. Negi will focus on scaling renewable energy projects, strengthening the company's transmission infrastructure, and expanding its domestic and international footprint. His expertise in large-scale project execution, grid integration, and operational excellence will be instrumental in KPI Green Energy's next growth phase.

Dr. Faruk Patel, Chairman and Managing Director of KPI Green Energy, stated: "We are at a turning point in India's renewable energy transition, and the demand for robust, reliable transmission networks and large-scale clean energy projects is greater than ever. Mr. Negi's wealth of experience in power infrastructure and project execution will be invaluable as we scale our solar, hybrid, and transmission projects. His leadership will ensure that KPI Green Energy continues to set new benchmarks in innovation, efficiency, and sustainability."

Dr. Alok Das Group CEO of KP Group, added: "Mr. Negi's deep expertise in power transmission and renewable energy, combined with his strong leadership in grid modernization and smart energy solutions, makes him an ideal fit for KPI Green Energy's expansion strategy. His ability to deliver high-impact projects on time and with operational excellence will accelerate our mission of building a cleaner, more resilient energy future."

Surinder Kumar Negi Takes Helm as COO at KPI Green Energy

KPI Green Energy has appointed Surinder Kumar Negi as its new Chief Operating Officer, effective March 12. With over 40 years of experience in power transmission, renewable energy, and infrastructure, Negi has held significant roles at companies like NTPC, POWERGRID, and ALSTOM.

KPI Green Energy has announced a strategic leadership move by appointing Surinder Kumar Negi as their new Chief Operating Officer. The appointment is set to take effect on March 12, as stated in the company's recent exchange filing.

Negi, a seasoned veteran in the power transmission and renewable energy industries, brings a wealth of experience to the role. Over his 40-year career, he has held prominent positions at major corporations, including NTPC, POWERGRID, ALSTOM, Reliance Energy, and the Gujarat Energy Transmission Corporation (GETCO).

This appointment is poised to enhance KPI Green Energy's leadership strength in the sectors of power transmission and renewable energy, aligning with the company's growth and strategic goals.

KPI Green Energy Appoints Surinder Kumar Negi As New COO

NEW APPOINTMENT

Surinder Kumar Negi
Chief Operating Officer (COO). KPI Green Energy

Gujarat-based KPI Green Energy has appointed Surinder Kumar Negi as its new Chief Operating Officer (COO). Negi brings over four decades of experience in the power transmission, renewable energy, and infrastructure development sectors. He has previously held leadership roles at NTPC, POWERGRID, ALSTOM, Reliance Energy, Gujarat Energy Transmission Corporation (GETCO), and Skipperseil Ltd.

As Managing Director of Gujarat Energy Transmission Corporation (GETCO), he added 830 new substations and 21,300 km of transmission lines, expanding Gujarat's power grid to support over 23,000 MW of generation capacity. Under his leadership, GETCO invested over ₹12,000 crore in infrastructure development, achieving industry-leading transmission losses below 4% and improving system availability to 99.6%.

At KPI Green Energy, Negi will focus on scaling renewable energy projects, strengthening the company's transmission infrastructure, and expanding its domestic and international footprint. His expertise in large-scale project execution, grid integration, and operational excellence will be instrumental in KPI Green Energy's next growth phase.

Faruk Patel, Chairman and Managing Director of KPI Green Energy, stated: "Negi's wealth of experience in power infrastructure and project execution will be invaluable as we scale our solar, hybrid, and transmission projects. His leadership will ensure that KPI Green Energy continues to set new benchmarks in innovation, efficiency, and sustainability."

Alok Das, Group CEO of KP Group, added: "Mr. Negi's deep expertise in power transmission and renewable energy, combined with his strong leadership in grid modernization and smart energy solutions, makes him an ideal fit for KPI Green Energy's expansion strategy. His ability to deliver high-impact projects on time and with operational excellence will accelerate our mission of building a cleaner, more resilient energy future."

KPI Green Energy has been on a push to move to a new level of growth in the past two years, evolving considerably from an EPC firm focused on captive projects to a broader push into IPP as well as captive projects, while adding wind energy capabilities to its portfolio. Its order book is bulging with work that seems to indicate a strong growth momentum over 35% well into Fy 27 at this stage.
